

## MTC Cyber — Cyber Readiness Snapshot Report

Client: caldern.org

Date: 18<sup>th</sup> October 2025

Website / Domain: <https://caldern.org>

---

### Overview

MTC Cyber ran a quick public scan to check how well caldern.org is protected online. This free snapshot gives a general idea of how safely the website is set up from the outside.

---

Area	Result	Notes
SSL / Encryption	■ Excellent	The website uses a valid and secure connection (lock symbol in the browser).
Browser Safety Headers	■ Fair	Good overall, but two small safety settings could be added for extra browser protection.
CMS / Software Version	■ Excellent	The website platform is up to date and running well.
Public Port Exposure	■ Excellent	Only the ports needed for the website are open.
Breach Mentions	■ Excellent	No known data leaks found linked to this website.
Overall Rating:	■ Excellent — Strong and safe setup.	

---

### Summary of Findings

Your website looks well-secured and managed.

It uses a modern security certificate, hides unnecessary system access points, and doesn't appear in any breach lists.

Everything important is already in place.

A small improvement could be made by adding a few extra browser safety settings, but nothing urgent.

---

### Next Steps

For a deeper look, MTC Cyber can prepare a Full Cyber Report that:

- Explains each area in simple terms
- Has Screenshots to show evidence

- Lists recommended fixes
- Includes a short follow-up call for guidance
